

PARLEEN KAUR BAGGA

✉ parleenkaurbagga@gmail.com | 🌐 Github | in LinkedIn | ☎ +1 (619)904-2511

EDUCATION

San Diego State University
Bachelor of Science in Computer Science

Anticipated Graduation: May 2027
Cumulative GPA: 3.8/4.0

TECHNICAL STRENGTHS

Languages & Databases	Python, Java, JavaScript, TypeScript, MongoDB, MySQL, PostgreSQL, Firebase
Web Technologies	HTML5, CSS3, RESTful APIs, FastAPI, WebSocket
Framework & libraries	React.js, Node.js, Next.js, Express.js, Matplotlib, NumPy, Pandas
Tools	Docker, Git, Postman, Vercel, Cursor, AWS

WORK EXPERIENCE

ReplyQuick AI <i>Software Engineering Intern</i>	Remote, USA May 2025 - Aug 2025
- Optimized the company's voice response system by fine-tuning RetellAI and BlandAI integrations, reducing average call latency by 35% and improving voice-to-text accuracy in noisy conditions. - Built and deployed backend APIs using Supabase Edge Functions and Vercel, cutting server response times by 40% and ensuring seamless performance during traffic spikes. - Refactored messaging workflows to reduce Twilio API calls, cutting costs by 20% and speeding up bulk SMS delivery. - Designed and ran end-to-end QA tests with Postman and scripts, improving platform reliability by 30%. Technology used: TypeScript, Supabase, PostgreSQL, Vercel, RetellAI, Twilio, BlandAI, GitHub	
BatchMaster Software <i>Full-Stack Software Engineer Intern</i>	Irvine, CA, USA May 2024 - Aug 2024
- Built an interactive "Production Insights" webpage inside the BatchMaster ERP suite with React + Figma, letting plant managers monitor batch yields, cost variance, and QA flags in real time across desktop and mobile - Engineered a high-throughput Node.js/Express service backed by MySQL for formulation CRUD, lot-level traceability, and regulatory audit logs—tuning indexes and pooling to cut API latency by 20%. - Implemented OAuth 2.0/OpenID Connect SSO with QuickBooks, Sage, and SAP, reducing onboarding time by 30%. - Optimized Redis and async queues for 10k+ daily transactions, enabling zero-downtime CI/CD deployments. Technology used: React.js, JavaScript, Node.js, Express, MySQL, Figma, RESTful APIs, Redis	

PROJECTS

AI-Powered Mock Interview Platform	Jan 2026 - Feb 2026
- Developed a full-stack AI Mock Interview Web App for interviews with AI-generated feedback using Google Gemini. - Architected high-performance Gemini API workflows (500ms avg response) and designed a React (TypeScript) frontend with Firebase integration, cutting page load time by 30% and enabling secure progress tracking. Technology used: React (TypeScript), Firebase, REST APIs, Shadcn UI, TailwindCSS	
Uber Clone Project	Nov 2025 - Dec 2025
- Built a full-stack Uber-style ride-booking app with real-time matching, OTP verification, and fare estimates. - Designed scalable RESTful APIs using Node.js, Express, MongoDB, and JWT with token blacklisting, and integrated Socket.IO for live ride requests, driver tracking, and real-time status updates. Technology used: React, Node.js, Express.js, MongoDB, Socket.IO, JWT, REST APIs	
Emotion Detection from Speech	Oct 2024- Dec 2024
- Deployed an Azure-based emotion detection pipeline using LSTM/CNN models, achieving 95% accuracy. - Engineered a distributed data preprocessing pipeline handling 100k+ samples with 70% faster processing, and conducted hyperparameter tuning with MLflow, improving F1-score by 4 points. Technology used: Python, PyTorch, Scikit-learn, Azure, Git, MLflow, Pandas, NumPy, TensorFlow, SQL, Azure	

LEADERSHIP & INVOLVEMENTS

Most Innovative Solution Winner – AWS Hackathon (Innovate 4 SDSU)	Oct 2025
Active member of Women in Tech & ELeet Coders Club at SDSU	Aug 2024 - Present
Changemaker, Delegate, Round Square International Conference(RSIC), London	Sept 2022 - Oct 2022
